

Vapor Withdrawal Cylinders

Cylinders - Manchester

	Manchester P/N	Description	Approximate
	9366	20# Lawn Mower Horizontal Green OPD Alum	70% or 4 gal
	9367	33.5# Lawn Mower Green OPD Alum	70% or 7 gal
	9368	43.5# Lawn Mower Green OPD Alum	70% or 9 gal
	9287TCLH	TC/DOT 20# Vertical Alum Cylinder	70% or 4 gal

Proper Filling Procedures

- Fill standing vertical. (relief valve at top)
- Open relief valve
- Fill cylinder slowly until relief valve spits out liquid propane. (stop immediately) once stopped check fuel level by opening relief valve, if continuous liquid, bleed off, if nothing comes out, continue to fill, if it spits, some liquid and nothing, then it is filled properly.
- Replace cap on quick fill

Overfilling will cause freezing of regulator stopping fuel flow causing ultimate damage to regulator.
